EXPERIENCE

Junior Software Developer
Mira Software Solutions

December 2024 - Present
San Isidro, Nueva Ecija, PH

Worked on multiple projects for the company and its clients using Laravel, React, and WordPress. Designed and developed web applications that enhanced functionality, improved user experience, and met business requirements.

- Designed and contributed to the development of the company's official website.
- Assisted in building and implementing e-services solutions for a key client.
- Supported client web applications by fixing bugs, adding new features, and ensuring smooth functionality.

EDUCATION

Nueva Ecija University of Science and Technology, San Isidro, Nueva Ecija — *BSIT*
August 2020 - July 2024

PROJECTS

SpendQuest — *Laravel, React, Inertia JS, Next JS, and MySQL*

SpendQuest is a full-stack budget and expense management web application designed to help budget-conscious individuals take control of their finances. It allows users to easily track daily expenses, organize spending into custom categories, and set budget limits to better manage their money.

Mira Company Website — *Next.js, Figma*

Designed and contributed in the development of the company website using Figma for design and Next.js for implementation. Focused on creating a modern, responsive, and user-friendly interface that showcased the company's services and improved online presence.
